PROFESSIONAL OVERVIEW

I am a Software Engineer specializing in web application development, AI integration, and backend systems. My experience spans full-stack development, embedded communication, and data-driven problem solving. I hold a B.S. in Software Engineering from Clarkson University, where I graduated with a 3.88 GPA. I've contributed to impactful projects at GE Aerospace and The Shipley Center for Innovation and founded the Clarkson University Software Engineering Club, where I led teams focused on advancing collaboration and innovation across software and hardware disciplines.

WORK EXPERIENCE

Software Engineer

Connection Technology Center, Victor, New York | Jun 2025 - Present

- At Connection Technology Center, I develop systems that transmit hardware data via Bluetooth and UART, using MQTT for real-time communication. I build React-based web apps, integrate AI for intelligent processing, and apply mathematical data manipulation to optimize performance and extract insights.

Engineering Engines Computer and Software Engineering Co-op

GE Aerospace, Lynn, Massachusetts | Jan 2024 – Jun 2024

- Contributed to the enhancement of software and build processes, as well as successfully restoring lost data. Leveraged Linux systems, coding expertise, and physical testing to drive team success and project efficiency.

Software and Mechanical Engineering Internship

The Shipley Center for Innovations, Potsdam, New York | Feb 2023 – May 2025

- An entrepreneurial support hub that helps bring business ideas to life.

Android Application – Software Engineering team

Potsdam, New York | Aug 2023 – Dec 2023

- Designed and implemented an Android application that enhanced security for transportation log accounts using keystroke dynamics, offering users personalized and secure access.

Business Owner - Founder and President

Kid Krew, Lowell, Massachusetts | 2013 – 2021

- Established, advertised, and managed Kid Krew for 8 years. Educated me in time management, business skills, communication, and customer service.

EDUCATION

Bachelor's degree

Clarkson University, GPA: 3.88
2025

Major: Software Engineering
Minors: Electrical Engineering,
Business, and Mathematics

SKILLS

- Communication
- Teamwork
- Critical thinking
- Time management
- Leadership
- Adaptability
